

Sport Skill

Facility * Completed by * Date *

What this sheet controls. Your drills for each sport, where skill sits in the session, and how it changes on tired days.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. What are the top 3 skills per sport and position, and why?

2. How do you know an athlete is ready to move from Build to Blend to Express?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
Which comes first after Core 4? *		Skill (STS): Skill fresh, then speed. Speed: Sprints fresh, then skill.
On tired days, skill work... *		Stays mostly: Yellow keeps 80%. Red: technique reps at 60%. Scales down (STS): Yellow keeps 70%. Red: technique reps at 50%. Cuts hard: Yellow keeps 50%. Red: no skill block.
The game day skill primer is... *		Light: 30% of normal. Moderate (STS): 50% of normal. Full: Normal amount.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your drills by sport

Sport 1 is required. Add up to 5. Tick Contact on drills with contact. Example (Football): Stance and start 6 reps, Position footwork 5 min, Ball security 20 reps.

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Yellow: amount kept	%	70
Red: mode		Technique reps
Red: amount kept	%	50
Game day primer	%	50
Session order		Skill, then speed

Common mistake. Skill work as filler. If it isn't tied to a sport demand and progressed, it's a workout, not training.
