

Start Here

What this is. These sheets turn your coaching philosophy into the rules the One Score app runs. Every athlete checks in each morning. The app scores them and builds their training for the day using your rules, not ours.

How every sheet works

1	Your philosophy	Free writing. Why you coach the way you do. Not imported.
2	Your decisions	Coaching questions with dropdown answers. Each answer quietly sets the app's numbers. Required.
3	Your program	Your exercises, drills, and days. Required where marked *.
4	Advanced numbers	Optional. Exact numbers that override a Layer 2 answer. Usually done with STS.

The rules for filling them out

Fill them on a computer or tablet in Adobe Acrobat, Preview, or a web browser, then save. Handwritten sheets cannot be imported.

Boxes marked * are required. The app will not import a sheet with a required box empty, and it will tell you which one.

Fill sheets 01 to 16 once for your facility. Fill sheet 17, Athlete Intake, once for every athlete.

Work in order. Later sheets use names from earlier ones: the sports on Sport Skill, the lift days on Strength, the tags on Core 4.

Words you will see

Zone	Green, Yellow, or Red. What the score means for today's training.
Check-in	Five taps each morning: sleep hours, sleep quality, soreness, stress, energy. Plus one tap for nutrition.
Trend	How the last 7 days of check-ins count alongside today.
RPE	How hard a session felt, 1 to 10. The athlete taps it after training.
Tonnage	Sets x reps x load for every lift in the session.
Training load	How much work the athlete did. Tonnage, minutes, and RPE combined.
A:C	This week's training load compared to the last month's. A big jump means the athlete is doing much more than they are used to.
Build day	A green day where the athlete has been under-loaded, so the app adds a set.
Anchor lift	The one main lift that stays fixed on a lift day for the whole block.
Day A, B, C	Your lift days in week order. The first lift day of the week is Day A.
Training max	The number all anchor loads are figured from. Set on test day.
Tag	A label on an exercise (Lower, Upper, Jump, Contact) so an injury restriction removes the right work.
Build, Blend, Express	Learn it clean, add variability, then do it at game speed.

Scoring & Zones

Facility *

Completed by *

Date *

What this sheet controls. How the morning check-in becomes one score, how strict the zones are, and how training load moves them.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. When an athlete walks in tired, what do you do, and why?

2. What should the score never override?

3. Who reviews Red athletes, and how fast?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
How cautious are you with a tired athlete? *		Protect them: Green takes 80+. More Yellow and Red days. Balanced (STS): Green takes 75+. Red below 55. Push them: Green takes 70+. Fewer pull-back days.
How much should one bad night count? *		A lot: Today's check-in drives the day. Balanced (STS): Today counts most. The week still matters. Very little: The week's trend drives the day.
What matters most in the check-in? *		Balanced (STS): Sleep 40, soreness 20, stress 15, energy 15, nutrition 10. Sleep first: Sleep 55. Everything else shares the rest. Body first: Soreness and energy 50. Life stress first: Outside stress 30.
How far back should the app look at training load? *		Short memory: This week vs the last 3 weeks. Standard (STS): This week vs the last 4 weeks. Long memory: This week and a half vs the last 5 weeks.
When training load jumps fast, you... *		Pull back hard: Smaller jump drops a zone. Pull back (STS): A big jump drops a zone. Only flag it: Coach gets flagged. Plan stays.
A fresh athlete who has been under-loaded... *		Gets more work (STS): Build day: an extra set on Green. Keeps the plan: No extra work.

Scoring & Zones

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.
If you override any weight, fill all six. They must add up to 100.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Sleep hours weight	pts	25
Sleep quality weight	pts	15
Soreness weight	pts	20
Stress weight	pts	15
Energy weight	pts	15
Nutrition weight	pts	10
Trend weight	%	40
Green starts at		75
Yellow starts at		55
Tonnage divisor		100
Acute window	days	7
Chronic window	days	28
A:C high line		1.5
Above the high line		Drop one zone
A:C low line		0.8
Below the low line on Green		Build day

Common mistake. Treating A:C as the verdict. It is a flag that moves the zone, not the thing that sets it.

Facility * Completed by * Date *

What this sheet controls. Your weekly test, how much a drop matters, and when maxes get re-set.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. Which tests matter for your sports, and what does each tell you?

2. What does a bad test day mean to you?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
How much should a drop in the weekly test affect the day? *		Big deal: Small drops cost points. Balanced (STS): Down 4% costs 5 pts. Down 7% costs 10. Small deal: Only big drops cost points. Track only: Recorded. Never changes the score.
Compare each test to the athlete's last... *		2 weeks: Quick to react. Month (STS): Steady. 2 months: Slow to react.
Re-test anchor maxes every... *		4 weeks (STS): 6 weeks: 8 weeks:
On Yellow and Red days, testing... *		Always runs: Test as scheduled. Protects (STS): Yellow: weekly test only. Red: none. Stops: No testing on Yellow or Red.
Do you track bar speed every session? *		No (STS): Yes: Bar speed down 10% drops a zone.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your weekly test

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Test name *		Countermovement jump
Test day *		Mon
Unit *		in

Testing

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Higher or lower is better *		Higher

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Baseline window	days	30
Small drop starts at	%	4
Small drop: points off		5
Big drop starts at	%	7
Big drop: points off		10
Re-test maxes every	weeks	4
Yellow day testing		Weekly test only
Red day testing		No testing
Bar speed check		Off
Bar speed drop that lowers a zone	%	10

Common mistake. Testing everything and acting on nothing. If a result can't change the plan, it doesn't belong in the score.

Core 4 Movement Prep

Facility * Completed by * Date *

What this sheet controls. The four prep exercises every session starts with.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. Why these four, in this order?

2. How long should prep take, start to finish?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
On a Red day, prep... *		Stays the same (STS): Full prep every day. Gets shorter: 1 set of each.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your Core 4

Tag an exercise Lower or Jump so an injured athlete skips it. Example: 90/90 Hip Switch 2 x 6/side (None), Glute Bridge 2 x 10 (None), Walking Lunge + Reach 2 x 10 yd (Lower), Pogo Jumps 2 x 10 (Jump).

#	EXERCISE	SETS	REPS / DOSE	TAG
1				
2				
3				
4				

Common mistake. A warm-up that eats the session. Prep gets athletes ready fast. It is not a workout.

Sport Skill

Facility * Completed by * Date *

What this sheet controls. Your drills for each sport, where skill sits in the session, and how it changes on tired days.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. What are the top 3 skills per sport and position, and why?

2. How do you know an athlete is ready to move from Build to Blend to Express?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
Which comes first after Core 4? *		Skill (STS): Skill fresh, then speed. Speed: Sprints fresh, then skill.
On tired days, skill work... *		Stays mostly: Yellow keeps 80%. Red: technique reps at 60%. Scales down (STS): Yellow keeps 70%. Red: technique reps at 50%. Cuts hard: Yellow keeps 50%. Red: no skill block.
The game day skill primer is... *		Light: 30% of normal. Moderate (STS): 50% of normal. Full: Normal amount.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your drills by sport

Sport 1 is required. Add up to 5. Tick Contact on drills with contact. Example (Football): Stance and start 6 reps, Position footwork 5 min, Ball security 20 reps.

SLOT	DRILL	AMOUNT	UNIT	CONTACT
Sport 1				
Drill 1				☐
Drill 2				☐
Drill 3				☐
Sport 2				

Sport Skill

SLOT	DRILL	AMOUNT	UNIT	CONTACT
Drill 1				☐
Drill 2				☐
Drill 3				☐
Sport 3				
Drill 1				☐
Drill 2				☐
Drill 3				☐
Sport 4				
Drill 1				☐
Drill 2				☐
Drill 3				☐
Sport 5				
Drill 1				☐
Drill 2				☐
Drill 3				☐

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Yellow: amount kept	%	70
Red: mode		Technique reps
Red: amount kept	%	50
Game day primer	%	50
Session order		Skill, then speed

Common mistake. Skill work as filler. If it isn't tied to a sport demand and progressed, it's a workout, not training.

Facility * Completed by * Date *

What this sheet controls. Your sprint drill for each day, and what happens to speed work on tired days.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. Which speed qualities matter most for your athletes?

2. What is your rep cap, and why?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
On tired days, speed work... *		Protects quality (STS): Yellow: 2 fewer reps, never below 2. Red: none. Keeps sprinting: Yellow: 1 fewer rep. Red: half reps. Stops: No sprinting on Yellow or Red.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your speed work

Day A is your first lift day of the week, Day B your second, Day C your third. Example: A 10 yd acceleration x 6, B Flying 20 yd x 4, C 10 yd acceleration x 6, Practice 10 yd acceleration x 4.

DAY	DRILL	REPS
Day A		
Day B		
Day C		
Practice day		

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Yellow: reps removed		2
Minimum reps		2
Red day		Remove
Common mistake. Turning speed into conditioning. Short rest kills speed quality.		

Facility *

Completed by *

Date *

What this sheet controls. The Anchor Method: one fixed main lift per lift day, its accessories, how the anchor progresses, and what tired days change.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. Why these anchors on these days?

2. When is a new exercise earned versus a small variation?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
How does the anchor progress across the off-season? *		Volume first (STS): Sets climb 3 to 5, then load climbs. Steady: 4 x 5 at 75% the whole block. Intensity first: Reps drop 6 to 2 as load climbs. Custom: Fill the block table in Layer 4.
On tired days, the anchor lift... *		Protects: Yellow: 1 less set at 85%. Red: 3 x 3 at 55%, no accessories. Balanced (STS): Yellow: 1 less set at 90%. Red: 3 x 3 at 60%, no accessories. Keeps lifting: Yellow: same sets at 90%. Red: 3 x 3 at 65%, 1 accessory set.
On a Build day, add... *		1 set (STS): Anchor and accessories. 2 sets: Anchor and accessories. Nothing: Build days off.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your anchor lifts

Day A is your first lift day of the week, Day B your second, Day C your third. Example: A Back Squat (Lower), B Bench Press (Upper), C Trap Bar Deadlift (Lower).

DAY	ANCHOR LIFT	REGION
Day A		
Day B		
Day C		

Your accessories

Reps can be a number or a time (30s). Load can be pounds or BW. Region lets an injury restriction remove the right ones.

SLOT	EXERCISE	SETS	REPS	LOAD	REGION
Day A #1					
Day A #2					
Day A #3					
Day B #1					
Day B #2					
Day B #3					
Day C #1					
Day C #2					
Day C #3					

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

Custom 20-week block

Required only if you picked "Custom" for the block question.

WEEKS	SETS	REPS	% OF TRAINING MAX
1 to 4			%
5 to 8			%
9 to 12			%
13 to 16			%
17 to 20			%

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Build day: sets added		1
Yellow: anchor sets change		-1
Yellow: anchor load	%	90
Yellow: accessory sets change		-1

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Red: anchor sets		3
Red: anchor reps		3
Red: anchor load	% max	60
Red: accessories		Remove

Common mistake. Changing exercises for novelty. The anchor stays. The volume moves.

Conditioning

Facility *

Completed by *

Date *

What this sheet controls. Your conditioning for each lift day, when it gets skipped, and what tired days change.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. What does your sport demand: repeat sprints, sustained work, or both?

2. How do you count conditioning that happens in practice?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
On practice days, extra conditioning is... *		None (STS): Practice covers it. Half: Full:
The day before a game, conditioning is... *		None (STS): Half: Full:
On tired days, conditioning... *		Scales down (STS): Yellow: half. Red: none. Mostly stays: Yellow: 75%. Red: half. Stops: None on Yellow or Red.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your conditioning

Day A is your first lift day of the week, Day B your second, Day C your third. Example: A Tempo run 100 yd x 8 (Run), B Bike sprint 15 sec x 10 (Bike), C 300 yd shuttle x 2 (Run). Swap: Bike sprint 15 sec x 10.

DAY	DRILL	AMOUNT	UNIT	TYPE
Day A				
Day B				
Day C				
No-run swap				Used when running is restricted

Conditioning

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Yellow: amount kept	%	50
Red day		None

Common mistake. Stacking conditioning on hard practices. Count practice load before you add more.

Facility *

Completed by *

Date *

What this sheet controls. How practice and game load gets counted, and what the performance piece looks like around them.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. How does the weight room work with sport coaches on load?

2. What should the day after a game look like?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
Who rates how hard practice was? *		Athlete (STS): Athlete taps RPE after practice. Coach: Coach tags the whole practice once.
On practice days, the weight room does... *		Prep, skill, short speed (STS): No lifting. Prep, skill, light lift: Reduced strength, short speed. Prep and skill only: No lifting or sprinting.
On game day, the athlete does... *		Prep + skill primer (STS): Prep only: Nothing: Just play.
The day after a game is... *		Never Green (STS): Capped at Yellow. Recovery only: Capped at Red. Score decides: No cap.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your defaults

Athletes can change the minutes when they log. Which days are practices and games is set on Season Phase.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Typical practice length *	min	90
Typical game length *	min	70

Common mistake. Ignoring practice load. The training load is only true if every minute on the field gets counted.

Facility * Completed by * Date *

What this sheet controls. Daily calorie and macro targets, and how nutrition affects the score.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. What is the first nutrition habit you would enforce?

2. Who handles allergies, medical needs, or special diets?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
How hard do you push fueling? *		Maintain: Hold bodyweight. Perform (STS): Fuel the work. Gain: Add size.
Protein target *		Standard: 0.8 g per lb. High (STS): 1 g per lb. Very high: 1.2 g per lb.
Missed nutrition yesterday... *		Counts (STS): Loses the nutrition points. Tracked only: No score change.
Calorie deficits for athletes under 18... *		Never (STS): With a dietitian: Only with a registered dietitian and a parent.
On Yellow and Red days, nutrition... *		Same targets: Protect recovery (STS): Protein first. No deficit on Red.

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install. Carbs fill the remaining calories.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Off day calories	cal/lb	15
Lift day calories	cal/lb	18
Practice day calories	cal/lb	20
Game day calories	cal/lb	20
Protein	g/lb	1.0

Nutrition

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Fat	g/lb	0.4
Missed nutrition		Lose nutrition points
Deficits under 18		Not allowed
Yellow day		Same, protein first
Red day		Same, no deficit

Common mistake. Chasing precision before consistency. A number logged daily beats a perfect plan followed twice.

Facility * Completed by * Date *

What this sheet controls. Your sleep standard, and what happens when an athlete keeps sleeping short.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. What is your minimum sleep standard, and why?

2. How do you teach sleep habits to athletes and parents?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
Your sleep goal for athletes is... *		7+ hours: Taps: under 5, 5, 6, 7, 8+. 8+ hours (STS): Taps: under 6, 6, 7, 8, 9+. 9+ hours: Taps: under 7, 7, 8, 9, 10+. Younger athletes.
When an athlete keeps sleeping short... *		Talk to them (STS): 3 nights under 7 hrs: coach conversation. Talk and hold back: 3 nights under 7: talk + cap at Yellow. Catch it early: 2 nights under 7: talk + cap at Yellow.

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Tap 1 = under	hrs	6
Tap 2	hrs	6
Tap 3	hrs	7
Tap 4	hrs	8
Tap 5 = at least	hrs	9
Flag after	nights	3
Flag when under	hrs	7
Flag action		Coach conversation

Sleep

Common mistake. Punishing honesty. If athletes lose playing time for reporting bad sleep, they stop reporting it.

Facility * Completed by * Date *

What this sheet controls. When outside stress gets a coach involved, and how known stress weeks are handled.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. Which outside stressors hit your athletes most?

2. What does a coach say when stress gets flagged?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
When stress stays high... *		Talk after 2 days (STS): Stress at 1 for 2 days: conversation. Talk right away: Stress at 2 or lower for 1 day: conversation. Talk and hold back: Stress at 1 for 2 days: talk + cap at Yellow.
During exam weeks and travel... *		Never Green (STS): Capped at Yellow. Score decides: No cap.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your referral

Anything beyond normal stress leaves the app and goes to a person.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Serious concerns go to *		School counselor and parents

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Flag when stress is at or below		1
For this many days		2
Action		Coach conversation

Outside Stress

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Known stress windows		Cap at Yellow

Common mistake. Treating stress as a training variable only. Some Red days need a conversation, not a lighter squat.

Body Check

Facility * Completed by * Date *

What this sheet controls. When soreness gets a coach involved, and where pain goes instead.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. How do you teach the difference between soreness and pain?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
When soreness stays high... *		Check after 3 days (STS): Soreness at 1 for 3 days: coach check. Check after 2 days: Soreness at 1 for 2 days: coach check. Check and hold back: Soreness at 1 for 2 days: check + cap at Yellow.
Pain (sharp, joint, one side) goes to... *		Athletic trainer (STS): Head coach:
Should athletes tap where they are sore? *		No (STS): Keeps check-in under 30 seconds. Yes: Adds a body-map tap.

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Flag when soreness is at or below		1
For this many days		3
Action		Coach check

Common mistake. Treating pain like soreness. Soreness adjusts volume. Pain goes to the athletic trainer.

Availability & Injury

Facility * Completed by * Date *

What this sheet controls. What each injury restriction removes or swaps, what an Out athlete does, and how they come back.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. Who on your staff sets and clears an athlete's status?

2. How does status get communicated to sport coaches and parents?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
An athlete who is Out does... *		Prep + rehab (STS): Rehab only: Prep only:
Who can clear an athlete to train? *		Either (STS): Athletic trainer or medical provider. Athletic trainer: Medical provider:
After an injury, the anchor lift comes back... *		Slowly: Start at 50%, add 5% a week. Steadily (STS): Start at 60%, add 10% a week. Quickly: Start at 70%, add 15% a week.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your restrictions

Remove takes out anything tagged for it on the other sheets. Swap replaces the anchor with the exercise you list. Example: No lower body: Swap, Landmine Press 4 x 8.

RESTRICTION	ACTION	SWAP EXERCISE	SETS	REPS
No lower body				
No upper body				
No sprinting				
No jumping				
No contact				

Availability & Injury

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Return start load	% max	60
Return weekly step	%	10
Out plan		Core 4 + rehab
Who clears		Either

Common mistake. Letting a good score clear an injured athlete. The score measures readiness, not tissue.

Season Phase

Facility * Completed by * Date *

What this sheet controls. Your phase dates, your week for each phase, and how training changes across the year.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. What does "maintain" mean in-season for your athletes?

2. Multi-sport athletes: whose season wins, and why?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
The off-season is for... *		Building everything (STS): Full accessories, full conditioning, Build days on. Strength first: Full accessories, 60% conditioning.
The preseason is for... *		Getting sport-ready (STS): Anchor 3 x 5 at 75%. More speed and conditioning. Holding strength: Anchor 4 x 5 at 77%. A little more speed. Conditioning push: Anchor 3 x 5 at 70%. Conditioning way up.
In-season lifting is... *		Heavy, low volume (STS): Anchor 3 x 4 at 80%. 2 accessory sets. No conditioning. Moderate: Anchor 2 x 5 at 75%. 2 accessory sets. Minimal: Anchor 2 x 3 at 80%. No accessories.
The postseason is... *		Off the bar (STS): Prep and play only. Light lifting: Anchor 2 x 5 at 60%. 1 accessory set.
The first week of a new phase... *		Eases in (STS): One step lower in volume. Starts full:
A multi-sport athlete follows... *		In-season sport (STS): Primary sport:

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Your phase dates

One set of dates per facility. Sport-specific dates can be added during the install.

PHASE	START DATE (MM/DD)
Off-season	

Season Phase

PHASE	START DATE (MM/DD)
Preseason	
In-season	
Postseason	

Your week for each phase

Example off-season: Mon Lift, Tue Practice, Wed Lift, Thu Practice, Fri Lift, Sat Game, Sun Off.

PHASE	MON	TUE	WED	THU	FRI	SAT	SUN
Off-season							
Preseason							
In-season							
Postseason							

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

Phase dose

0 sets = none. Cond 100% = as written on the Conditioning sheet.

PHASE	ANCHOR SETS	REPS	% MAX	ACC SETS	SPEED +/- REPS	COND %	BUILD DAYS
Off-season	Strength block						
Preseason							
In-season							
Postseason							

Common mistake. Running an off-season program in-season. Practices and games are the volume now.

Athlete Profile Rules

Facility *

Completed by *

Date *

What this sheet controls. What every athlete intake must include, and how new lifters start.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. What do you need to know about an athlete before day one?

2. How do you start a brand new lifter?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
Who counts as a new lifter? *		Under 1 year (STS): Advanced at 3+ years. Under 2 years: Advanced at 4+ years.
A new lifter starts with... *		Technique first (STS): Core 4 and anchor technique only. Full plan, light: Standard plan at technique loads.
Build days are for... *		Everyone past new (STS): Advanced only: No one:
An athlete with no tested max lifts... *		Technique weights (STS): Coach sets load:
Bodyweight gets updated... *		Weekly: Monthly (STS): Each test day:

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Required on every intake

Name and sport are always required.

FIELD	REQUIRED
Position	☐
Grade or age	☐
Bodyweight	☐
Training age	☐

Athlete Profile Rules

FIELD	REQUIRED
Injury history (12 months)	☐
Parent or guardian contact (under 18)	☐

4 Advanced numbers (optional)

Leave blank and your Layer 2 answers set these. A filled box overrides the answer. Usually completed with STS during the install.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
New lifter: up to	years	1
Advanced from	years	3

Common mistake. Skipping intake to get athletes moving faster. Every rule downstream is only as good as the profile.

Coach Override

Facility * Completed by * Date *

What this sheet controls. Who can override the score, and who hears about what, and when.

1 Your philosophy

Write it the way you would explain it to a new coach. Not imported. It stays with your install notes.

1. What does each audience need to know: athlete, sport coach, parent, owner?

2 Your decisions

Pick the answer that matches how you coach. Each answer sets the app's numbers for you. "STS" marks the Strength Through Systems standard.

QUESTION	YOUR ANSWER	WHAT EACH ANSWER MEANS
Who can override an athlete's zone? *		Head coach only: Head coach + AT (STS): Head coach and athletic trainer. Any coach:
Moving an athlete up a zone... *		Needs a reason (STS): One line, reviewed weekly. No reason needed:
When an athlete is Red, the coach hears... *		Same day (STS): Next morning:
An athlete stuck in Yellow gets a conversation after... *		2 days: 3 days (STS): 5 days:
Sport coaches get... *		Daily summary: Alert after 1 Red day. Weekly summary (STS): Alert after 2 Red days in a row. Nothing:
Parents get a report... *		Weekly: Monthly (STS): Never:
The owner gets a report... *		Weekly: Monthly (STS): Never:
Athletes see... *		Score + plan (STS): Nothing else. Score + plan + reason: A one-line reason for their zone.

Common mistake. Letting the app coach the athlete. The score starts the conversation. The coach finishes it.

Athlete Intake

Facility *

Completed by *

Date *

What this sheet controls. One per athlete. The athlete's starting data. Every facility rule reads from it.

3 Your program

Your exercises, drills, and days. Write them exactly as you want athletes to see them.

Athlete

Boxes without * become required if Athlete Profile Rules requires them.

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Name *		
Primary sport *		Must match a sport on Sport Skill
Second sport		
Position		
Grade		
Age		
Bodyweight	lb	
Years of training	years	

Training maxes

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Day A anchor max	lb	Blank = not tested yet
Day B anchor max	lb	
Day C anchor max	lb	
Weekly test baseline		Unit from the Testing sheet

Availability

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Status *		Full
No lower body	☐	
No upper body	☐	
No sprinting	☐	

Athlete Intake

RULE	YOUR RULE	PROTOTYPE EXAMPLE
No jumping	☐	
No contact	☐	
Injury history (12 months)		

Contact

RULE	YOUR RULE	PROTOTYPE EXAMPLE
Parent or guardian		Required under 18 if set on Profile Rules
Parent phone or email
